Oley Medikal established as a manufacturer of radiation protective products in 2012 in Istanbul-Turkey. Oley Medikal has been succesful in a short time as a reputable, respected and well known company in the field of radiation protective products.

As an independent and innovator manufacturer company, our well educated team still working on development and expanding our portfolio. Our priority is both maximum protection of user health and customer satisfaction.

Therefore, we have added our portfolio disposable protective products and we continue our journey with Surgical Textile Equipments.

Oley prides itself on quality products, each Oley Product comes with satisfaction guarantee.

Oley manufactured products are warrantied under normal use and service, to against from defects in material and workmanship for a period of one year from the original date of shipment by Oley.

We continue expand our family with our dealers day by day.

STERILE REINFORCED SURGICAL GOWNS

The materials used in the gowns is made of medical grade materials.

These extra protection gowns have an additional layer of absorbent material from wrist to elbow and over the front section. Ideal for longer procedures and those with a large amount of fluids.

They are ideal for heavy procedures where strike-through and two-way contamination of the surgeon and patient could occur.

CE Marked STERILE EO

Gown fabric allows the skin to breathe, but it will remove alcohol, blood and similar body fluids from the environment and do not allow it to pass to the bottom.

STERILE STANDARD SURGICAL GOWNS

Gown fabric allows the skin to breathe, but it will remove alcohol, blood and similar body fluids from the environment and do not allow it to pass to the bottom.

CE Marked STERILE EO

Various Material Thicknesses

LAMINATED PROTECTIVE GOWNS

Choosing the proper gowns for your surgical team members is an important part of your infection control strategy.

Impervious and High Fluid Gowns offer a high level of protection from blood and body fluids and help maintain the health and confidence of OR personnel.

Spunbond Film Laminate with Polyethylene Coating provides more fluid resistance.

RAPID TEST KITS

Rapid Antigen Test Kits

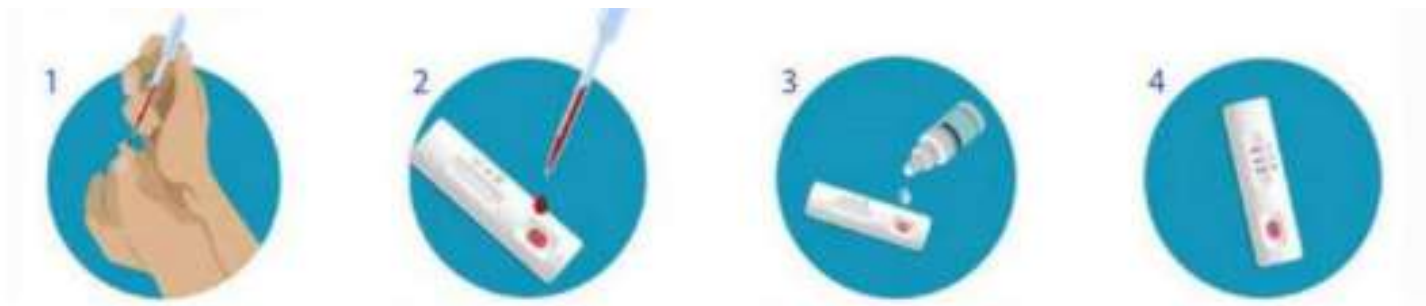

Self Swab Test

Self Saliva Test

This kit is used for in vitro qualitative detection of SARS-CoV-2 antigen. It is a lateral flow sandwich test designed for qualitative detection of nucleocapsid protein antigens in SARS-CoV-2 obtained directly from saliva.
Sensitivity : %96,66 , Specificity : %98,96

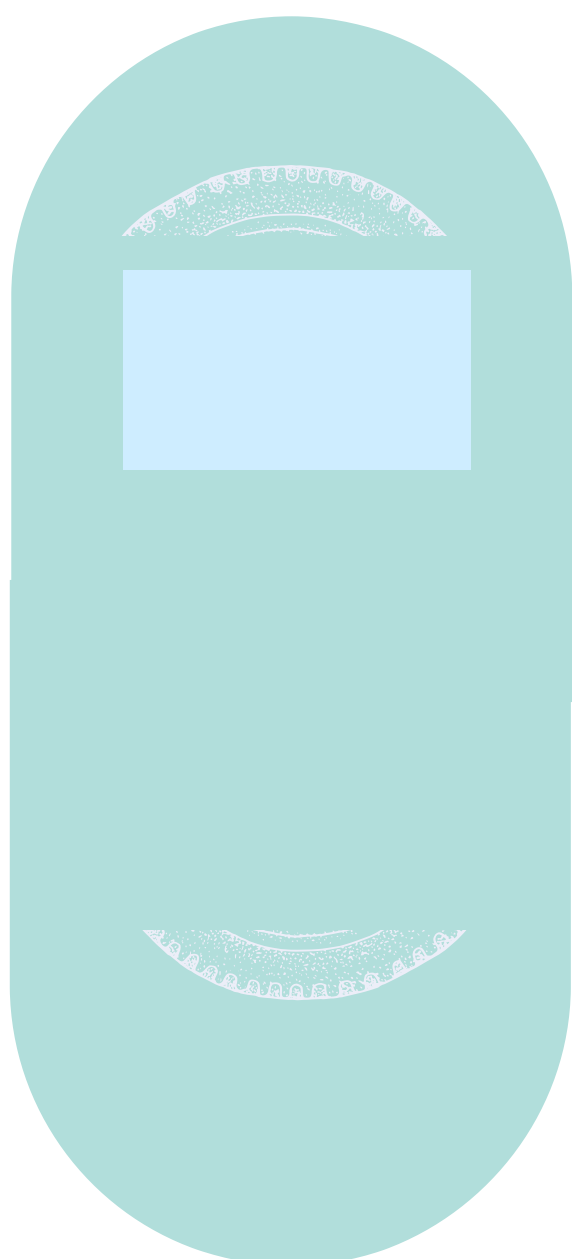

Rapid Antibody Test Kits

In the IgG or IgM test line area, it reacts with locally bound anti-human IgG or IgM, respectively and forms a colored line. If sample does not contain any COVID-19 antibodies, a colored line showing a negative result will not appear in any of the Test Line Areas. As a positive check for the correct performance of the tape's procedure and operation, a colored line should always be appearing in the Control Line Area. If Control Line area is empty, then the test is invalid.

Sensitivity : %96,66 , Specificity : %98,96
