

## Vertebroplasty Needles

Teknimed provides three new ranges of vertebroplasty needles (11G & 13G).

- **Standard range:** intended for percutaneous vertebroplasty procedure.
- **Confort Biopsy range:** dedicated to guided percutaneous vertebroplasty and biopsy procedures.

## Properties

All the Vertebroplasty Needles are available in two gauge sizes (**11G & 13G**) and **125mm** in length to ensure optimal adaptability

### Confort biopsy range:

The Confort Biopsy range is intended for guided percutaneous vertebroplasty and biopsy procedures.

The product is composed of the Confort range needle combined with a biopsy cannula designed with 5 sharp blades to facilitate the procedure.

A chuck is provided in order to extract the biopsy sampling from the cannula.

A laser marking allows a control of penetration depth.

### Standard range:

The Standard range is intended for percutaneous vertebroplasty procedure.

The bevel has been designed for easy penetration through cortical bone.

The chuck handle is lockable.

A laser marking allows a control of penetration depth.

## Storage & products

The Vertebroplasty Needles are packed in double sterile packaging. The needles are sterilized with ethylene oxide according to ISO 11135 and are ready to use. Single use only.

The product must be stored unopened in its original packaging in a clean environment and at room temperature.
